Dear Colleagues,

it is a pleasure for me to announce the 3rd Oncological Laryngology International Master that will be held in Vittorio Veneto from 20 - 23 June 2022.

This 4 day course will cover the current management of laryngeal cancer with an innovative format: alternation of live surgery and scientific discussion.

The course has been devised for 80 attendees physically on site in Vittorio Veneto Hospital. The scientific program will start with an introduction of laryngeal oncology concepts, that will focus on the bases of knowledge that we consider essential to the laryngologist who wants to deal with oncology.

Two contemporary live surgery sessions will be organized every day, with interactive participation for audience connected in Live Streaming from their own locations!

Transoral laser microsurgery, Open partial Horizontal laryngectomies and Total laryngectomies will be performed by the best Italian and European surgeons.

The format of the meeting will include prestigious invited 'state of the art lectures' and panel discussions enriched by pro and con debates.

I want to thank Prof. Giuseppe Rizzotto, Prof. Giovanni Succo and Prof. Livio Presutti, without whose contribution this event would not be possible.

Tradition and new perspectives in Mastering the Larynx!
